ABSTRACT

The Liquidity Aggregator Protocol

Built on the most advanced liquidity aggregator ever developed, Span Protocol solves some of the largest issues in DeFi by aggregating the liquidity of the entire crypto market into one decentralized platform. Governing the protocol is the proprietary staking mechanism Delegated Proof of Broker, fulfilling every function via a decentralized brokerage with the supply-capped SPAN token at its core. This underpins each industry-critical solution built on the protocol, from Span Terminal to Span Enterprise solutions for blockchains, exchanges, and crypto projects, with thirteen different revenue streams.

Span Protocol is a new kind of DeFi platform that combines the best features of exchanges, brokerages, and instant trading apps. The platform is built around a liquidity aggregator connected to all of the major crypto exchanges and swap pools (centralized and decentralized), enabling users to gain the best price for their trades from a single portal. Along with powerful tools for portfolio management, we offers exceptional security, convenience, and flexibility. The platform is suitable for experienced traders, institutional traders, and newcomers alike.

The Span Protocol platform and ecosystem is powered by the SPAN token, an BEP-20 token. Span Protocol will be an open-source repository for DApps, making all of the platform's functionality available to developers and businesses, enabling anyone to build powerful financial tools.

KEY FEATURES

The unique liquidity aggregator finds the best spot price. Span Protocol boasts a custom-designed matching engine, which connects to dozens of different exchanges in real time. It uses their combined order books to allow the trade of cryptocurrencies at the most advantageous prices, enabling us to pass the savings to our users. In addition to unbeatable savings and convenience, our engine is built into a traditional exchange interface and provides the largest list of supported currencies on the market.

Internal price matching engine. As the number of users increase, the platform will match orders effectively against each other on a peer-to-peer basis using our own internal DEX, further decreasing reliance on third-party exchanges. With the rise of user-friendly decentralized exchanges (DEXs), Span Protocol will be connected to more and more of these peer-to-peer cryptocurrency marketplaces. Users will increasingly be able to enjoy near-instant executions of their orders without risk.

A non-custodial platform. Users don't give up control of their funds, ever. we will allow users to transfer cryptocurrencies directly to an external wallet immediately after they have been purchased, meaning that no funds need to be held on the platform. Cold storage and user-controlled wallets vastly reduce the risks of hacking, theft, and downtime that is common in centralized crypto exchanges.

VALUES

- 1. Think Clearly**
- 2. Be Resourceful**

- 4. Dream Big**
- 5. Take Ownership and Be Decisive**
- 6. Remain Humble**
- 7. Transparency**
- 8. Community**

We consider clarity of thought to be the single most important trait we look for in our colleagues We think about the message we want to deliver before we speak, and know what is important and what is not We are concise and articulate, putting effort into making things simple and easy to understand.

We go beyond the surface to gain a deep understanding of every issue We always find a way to get things done with what's available, but we are not shy about asking for help when it's needed, We believe that great ideas can come from anywhere, regardless of seniority and experience.

We never give up, carry each other through hard times, and recognize grit in our colleagues We understand that building a world-changing company is a monumental task, but we love every minute of it We celebrate milestones together, recharge, and get back to work.
